## Module 9 Summary

Module 9 only has one session.

Session 9.1: In 9.1 we understand the basics of e-commerce, like where to search, to create an account, to search an item, add the item to the cart, and buy the item. I remember the first time I bought an item. My mom for the first time gave me access to her credit card (At 16). I was so happy but tank good I didn't go too crazy an only bought a 5-dollar item but was still something, and I like to think that was the moment my mom started to trust me with more serious things. Now I handle her and mine bank accounts.

E-commerce is divided into business to business(B2B), business to consumer(B2C), consumer to consumer(C2C), and mobile e-commerce (or m-commerce) and the different forms of e-commerce like online retail.
