Chapter 7 summary

Chapter 7 is about wireless connections we use in our everyday life like Wi-Fi, Bluetooth, and the different generations like 1G, 2G, 3G etc. This chapter did have somethings thar surprised me. I've used Wi-Fi since I was a child, although I don't know everything, I know enough to, in case I didn't know something, say "Oh that's why is called like that!!!" and "Oh so that is how it work!!!" Like Bluetooth. I didn't know that Bluetooth was literally personal radio links. This chapter really made me rethink how much I really know about the Wi-Fi I use every day?.
