Module 10 Summary

Chapter 10 has only 1 session.

Session 10.1:

Exploring the realm of data necessitates a grasp of its language. We will delve into the terminology employed in data analysis, unravel the principles of thinking and examine the techniques that data scientists employ to handle and decipher data. The data practices of media platforms will be scrutinized to unveil the types of information gathered about individuals online. Subsequently we will embark on a quest to comprehend how this data is utilized and potentially disseminated. Ultimately, we will furnish you with the knowledge and tactics to protect your information.
